**To:** City Council

**From:** Gary Hartwell

**CC:** Henry Hill

**Date:** November 10, 2008

**Re:** Monthly Report for October, 2008

We recorded 1.4 inches of rainfall in October as compared to 6.0 inches for last October. We used 790.8 million gallons (mg) of water for the month, which is 6.9 mg less than October of last year.

Our average usage this October was 25.5 million gallons per day (mgd) or about 251 gallons per person per day (gpcd). For October of 2007, we averaged 25.7 mgd for about 263 gpcd. Our daily water usage ranged from a minimum of 16.1 mgd on October 7 to a maximum of 38.7 mgd on October 1. Through October, we have used about 1,775 mg more water this year than in 2007. The usage per person through October of 2008 is about 247 gpcd as compared to 199 gpcd for the same period in 2007. The annual goal for the State of Texas is 140 gpcd.

Employees for the Water Division are beginning to make some landscape changes at the Frisco 1 pump station. The changes will include the installation of about 500 linear feet of wrought iron fencing with stone columns, several trees to complete the existing tree line that screens the pump station from the homes that back-up to the site, and some additional shrubs along the fence line.
